INTRODUCTION

Frontend developer specializing in React.js with 2 years of professional experience building scalable applications across web and mobile platforms. Strong foundation in component architecture, React Hooks, Redux Toolkit, lifecycle methods, and API integration.

Education

Master of Information Technology University of Newcastle	2025 – Present Sydney, Australia
Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT) Mechi Multiple Campus (TU Affiliated)	2018 – 2022 Jhapa, Nepal

SKILLS

Languages: JavaScript, TypeScript

Frameworks / Libraries: React.js, Redux Toolkit, React Native, Next.js, Node.js, Express

Other: Git, GitHub, CI / CD, Vercel, familiarity with DevOps with Git

Experience

Frontend Developer (React.js & React Native) Mantra IT Solution Pvt. Ltd.	November 2023 – May 2025 Lalitpur, Nepal
- Delivered React.js web and mobile apps for a contract farming and e-commerce system, improving user engagement by 30% through enhanced UX workflows. - Developed and maintained a royalty and inventory tracking system with React Native, reducing manual inventory mismatches by 40%. - Optimized application performance by refactoring reusable components, resulting in a 25% faster load time and improved maintainability.	
Frontend Development Intern (React & React Native) Mantra IT Solution Pvt. Ltd.	July 2023 – October 2023 Lalitpur, Nepal
- Contributed to the development of core components in React/React Native apps, improving UI consistency across platforms. - Assisted in delivery of two internal apps, gaining exposure to lifecycle methods, hooks, and component communication patterns.	

Projects

E-grow: Easy Farming : An e-commerce and contract farming platform using React Native, Redux Toolkit, and SQLite for mobile, alongside Next.js for the web. [\[Try it here\]](#)

Flight-X : Flight reservation module for Shree Airlines' ERP system and a mobile app for flight booking.

Sales-X : An inventory tracking and royalty management system featuring a hierarchical QR scanning system for efficient product dispatch and management.

Checked : An offline note-taking and checklist application to help users organize tasks and notes efficiently. [\[Try it here\]](#)

Photos Cloud : Built a cloud photo storage web app using Next.js, PostgreSQL, and Auth.js. [\[Try it here\]](#)
